the 12 standard features

...«the most popular and efficient promotional item that we have ever had. We would not be without!»  
 A statement which we continue to hear from customers all over the world.  
 The promotional item that compliments your image. A Swiss product of the highest quality, multifunctional, valuable and timeless!

Victorinox cutlery in Ibach-Schwyz

*We are delighted to present to you a unique range of splendid promotional gifts designed to create a long-lasting impression.*

*Victorinox products draw upon a century of tradition and experience. Their story began in 1884 when Karl and Victoria Elsener founded the company. In October 1891 the first knives for the Swiss Army were delivered. In 1897 the «Officer Knife», which later became known as the «Swiss Army Knife», was patented.*

*Our pocket-tools have demonstrated their exceptional usefulness on countless expeditions, on NASA Space Shuttle flights and in everyday practical use around the world.*

*In recognition of the elegance of its design, the New York Museum of Modern Art and the State Museum for Applied Arts in Munich have included the VICTORINOX «Officer Knife» in their «Good Design» collection.*

*A VICTORINOX multi-purpose pocket-tool is as much an indispensable and useful companion as any wrist watch. – «A friend, not just a knife» as a journalist once wrote.*

*From Lyndon B. Johnson onwards, it has been the custom of US presidents to give VICTORINOX pocket-tools as presents to their guests at the White House.*

*To date, over 200 well-known companies in Europe and America have used the VICTORINOX «Swiss Army Knife» in advertisements as an eye-catcher and symbol of quality and variety.*

*To achieve the optimum graphic presentation of your advertising message, the services of our in-house design studio are available free of charge.*

*We very much look forward to hearing from you*

VICTORINOX

*Carl Elsener*  
Carl Elsener

*The VICTORINOX guarantee is a life-time guarantee against any defects in material and workmanship and covers pocket-multi-tools («Officer Knife», small pocket-tools, SwissCard, SwissTool) and household knives.*

Karl Elsener developed the «Original Swiss Army Knife» and took out a patent for it in 1897.

*Carl Elsener*

On the ground floor of this house Karl Elsener installed his cutlery in 1884.

In October 1891, he obtained the first contract to supply the Swiss Army with a «Soldier's Knife».

Fresco by August Bächtiger, Gossau, on the factory's front facade dated from 1943.

## Multi-Purpose Pocket-Tools

The «Original Swiss Army Knives» became worldwide classics long ago. They are practical, useful and reliable. As with all VICTORINOX products, special high-alloy stainless steel and painstaking attention to detail during production guarantee the very highest quality. The VICTORINOX Emblem in metal inlay enhances the polished Cellidor handles.

### Standard type

**1.3603 Spartan** Length 91 mm  
contains the 12 standard features:

- |                            |                       |

## Small, Elegant Pocket-Tools

Our popular pocket-tool on a key chain provides valuable services for you every day. It is small, light, elegant, robust and functional all at the same time – an indispensable companion. The VICTORINOX metal inlay Emblem in the polished Cellidor handle is your guarantee for quality. The Signature model – with its handy ballpoint pen – is noteworthy as the only pocket-tool available with a pressurized ink refill that folds from 104 mm into a small key chain knife only 58 mm long.

## Altimeter

The VICTORINOX Altimeter with eighteen other functions is an innovative lifestyle tool for various recreational activities. It was especially developed for hikers, climbers, skiers and snowboarders. Despite its small size and remarkably low price, its readings are just as precise as larger standard models costing much more.

### 1.3705.AT Altimeter Length 91 mm

Victorinox guarantees all tools to be of first class stainless steel and also guarantees a life time against any defects in material and workmanship (for electrical part 2 years).

## Voyager

This is an integrated solution from Swiss Knife Valley. A digital watch, alarm clock and timer all in one package – the Voyager. The digital symbols and numbers of the settings in the display window are clear and easy to read. The VICTORINOX Voyager, with its small size, light weight (only 90 grams) and 21 practical tools or functions, is what everyone on the go should have tucked into a little corner of their checked luggage.

Clock Alarm Timer

## SwissFlame / Traveller-Set

Your pocket-tool is on fire! The SwissFlame has it all, including a lighter. A convenient trigger mechanism activates a blue laser flame. The lighter mechanism is based on popular Piezo technology. The Traveller-Set, your ideal travel companion, is just as reliable and functional. It is unbelievable how many indispensable tools and functions have been packed into this practical arrangement. It makes an exceptional gift that brings joy and personal security to the receiver.

### Technical data for items on pages 24–25

#### Inscription options:

- Tampoprint (stove enamelled) on the handle
- Etching on the handle or blade
- Engraving on the handle:
  - Name engraving (diamond engraving, contoured, standard letters, without additional colouring)
  - Logo + inscription (computer controlled diamond engraving, contoured, without additional colouring)

**Note:** We cannot recommend dark-on-light laser inscription, because in this process, the surface of the high-grade steel becomes warm, causing structural changes and a decrease in rust-resistance.

## CROSS-Sets

Two world famous brands for loyal customers! In collaboration with CROSS, VICTORINOX has developed a set which guarantees that your marketing message will be remembered regularly.

**CROSS-Set «Solo Classic» 4.4301 red, 4.4303 black**

**Technical data** for items on page 29

**Inscription options:** • Etching on the blade • Tampoprint on Swiss peeler and PET bottle opener

\* The illustrations show the models available. The correct item number for the relevant pouch size or gift box is indicated in the price list under the item number of the pocket-tool chosen by you.

## Inscription Information

*Your own promotional message can be printed on request on all models of our range. Your inscription artwork will be prepared digitally by our experts and processed on Macintosh computers for the process relevant to printing requirements.*

### *Inscription artwork*

Please supply your inscription artwork in one of the following formats:

#### **Electronic data**

**For company logos:** Vectorized graphic logos saved as Adobe Illustrator (.ai), CorelDraw (.cdr) or Freehand (.fh) format files or exported as an encapsulated postscript (.eps) file. Fonts should be exported as curves or supplied with the disc. Colours must be defined in a binding way (**Pantone, RAL, HKS**) or a colour sample must be attached.

**For photographs and images:** Images should be saved at 300 dpi under Photoshop as .jpg, .tif, or eps. JPG image files at 72 pixels or GIF files from the Internet are not suitable as prepress copy. Design suggestions developed under QuarkXPress or CorelDraw, or those saved as PDF files can be used by our specialists as prepress copy, but they must be converted or reworked in order to be used for Tampoprint. A hardcopy black-and-white or color printout is very helpful and helps ensure error-free transfer of the file. Data may be supplied by storage media (3.5" diskette, ZIP, CD) or by E-Mail.

#### **Conventional artwork**

You need to provide us with a reproducible black-and-white or color document (enlarged up to DIN A4, if possible). Films must usually be recorded and reworked by our specialists electronically. You can also send calling cards, letterheads, stickers or other documents that can be used as design samples.

We must have precise and **accurate color information (Pantone, RAL, HKS)** for color printing on advertising material.

### *VICTORINOX Emblem together with advertising imprint*

We recommend displaying the VICTORINOX Emblem together with your advertising imprint – where possible – because this symbol of origin and quality increases the value of your gift. The VICTORINOX Emblem may be placed either on the front (standard) or the reverse side, but only in the standard position. If you do not wish to have the Emblem (no discount!), please indicate this in your order.

#### **«Ready to print» proof**

On receipt of the first order, we will send, together with the order confirmation, coloured 1:1 proof on paper. For technical reasons, because this is produced by laser printer, the colours are not binding. For production reasons, depending on the inscription method used, R1, R2 .. (see next pages and folded page/41) appear after the item number.

## Inscription Options

*It is essential that any inscription added to these high quality products, which are used worldwide as promotional articles, be of the same high standard. Our state-of-the-art processes ensure that every design harmonises perfectly with the product, and acts as an effective ambassador for your company.*

### Tampoprint R2

A silicon rubber stamp is used to transfer ink from the engraved steel printing block to the item which is to be printed.

**Suitable for:** logos, lettering, photos and pictures

**Colours:** 1-5 colours according to Pantone, RAL or HKS (screen surfaces or flowing screen surfaces are printed with a 48 screen)  
4 colour photo print: (cmyk) (normally a 54 screen)

Colour printing on a dark background always requires preprinting in white. For cmyk printing, this means an additional expense, because the product must be printed twice (a one and a four colour process).

**Durability:** good

### Metal inlay R1

A chromium steel metal inlay is produced by means of photochemical techniques, and is then securely bonded into the plastic handle by heat and pressure (for technical reasons not possible for Nylon and translucent handles).

**Suitable for:** logos, text and medium-size lettering  
**Colours:** only silver (chromium steel)  
**Durability:** permanent  
**Important:** For technical reasons, all stand-alone letters, characters and logos must be joined together.

### Hot stamping R3

The design is impressed to a specific depth by means of a brass die-stamp, blocking foil, temperature and pressure. In contrast to the Tampoprint method, this is a dry printing process.

**Suitable for:** slim and medium-sized letters and numbers as well as simple logos  
**Colours:** silver, white, gold, blue, red, black, green, only one colour possible  
No colours as per Pantone

**Durability:** good with slim letters, not suitable for bold letters and large logos, or for combinations of slim and bold letters

**Note:** If small orders require an imprint only with text and no logo, we recommend the following 5 letter types. In this way there will be no die costs.

Available letters optimized for hot stamping:

### Positive metal inlay

Letters and joining in metal

### Negative metal inlay

In the negative metal inlay, closed letters and numbers must be «opened», (e.g. A,B,D,a,b,d,0,4,6,9). The text will show up in the colour of the handle.

### Positive and negative combined

### Metal inlay with etching

For fine details, which only appear on the surface of the metal inlay (possible also combined).

### Imprint with die

Imprint without foil (blind stamp)

### Stamping with existing letter types

Times (small)

Times (large)

Times (small + large)

Helvetica Condensed

Helvetica

Script

Inscriptions produced by electrolytic means (electrolyte and electric current).

SwissTool on blade R6  
SwissTool on handle R5

Electrolytic etching (positive and negative)

**Suitable for:**  
Logos with fine lines or large surfaces as well as slim and bold letters  
Knife blades and steel handle of SwissTool

**Colour:** anthracite/dark grey

**Durability:** good

**Note:** Inscription will be similar to the examples shown opposite.

A tool mills the inscription into the material. If the material is plastic, the engraving is picked out with a contrasting colour (white).

**Suitable for:** small series  
– individual names  
– short texts without logos (even special characters such as for Scandinavian and Latin languages, etc.)  
– logos and text (on SwissTool)

**Colours:** For plastic surfaces filled with white contrasting colour. For steel (SwissTool) without additional colouring.

**Durability:** very good

**Note:** Standard letters can be varied in size.

On SwissTool, logos and letters appear outlined (contour).

Logo and name of company diamond engraving, contoured (on handle) as per artwork supplied

Ornamental letters  
Script italics

Block letters  
Futura italics

Block letters  
Futura

Individual name  
diamond engraving,  
contoured (on handle)  
Font  
Modrome 313 2 L

The product pictures and the inscription surfaces illustrated (grey areas) are in a scale of 1:1. The inscription is placed by our experts inside these grey areas, observing optical and graphic rules, and in line with the request of the customer with regard to logo, letters/text.

# Positioning of Metal Inlay

(only for polished Cellidor handles)

Metal inlays give the promotional article a valuable and up-market look provided they are kept discretely small. Below you will find some examples of good positioning of your company logos.

## Multi-purpose Pocket-Tools «Original Swiss Army Knives»

## Small, Elegant Pocket-Tools

- SwissTool
- **Tampoprint** (on handle)
  - **Etching** (on handle or blade)
  - **Diamond-Engraving** (on handle)

Reverse side: (scale 1:2)

Reverse side: The VICTORINOX Logo is stamped into the metal.

**Important:** It is essential to indicate the required position of the inscription and the orientation of the reading.

## SwissTool Spirit

Reverse side: (scale 1:2)

Front side: (scale 1:1)

**Important:** It is essential to indicate the required position of the inscription and the orientation of the reading.

# Numbering Code

## Inscription options

- R2 = Tampoprint
- R1 = Metal inlay
- R3 = Hot stamping
- R5 = Etching on the SwissTool handle
- R6 = Etching on the blade

(see pages 34–36)

## Handle colours

with VICTORINOX Emblem 

- red
- .2 blue
- .3 black
- .4 dark green
- .7 white
- .8 yellow
- .T red translucent
- .T2 blue translucent
- .T4 green translucent

without VICTORINOX Emblem 

- .01 red
- .02 blue
- .03 black
- .04 dark green
- .07 white
- .08 yellow

Technical data as well as the available colours for each article are listed on the corresponding pages.
